Above All Things SAFETY

The American Clanny Safety Lamp was "approved" recently by the Pennsylvania Department of Mines for use in the bituminous mines.

A tried and proven lamp is better than an experiment. You cannot go astray in using the American Clanny.

Besides, as the oil vessel of the American Clanny is one single piece, and therefore seamless, it has a much longer life than the ordinary lamp and is more economical to use.

Price \$1.50 each

"HIRSCH" Original Electric Miner's Lamps

Are not an experiment. They have stood the test. A number of the largest coal mines in America have adopted them. A small portable storage battery generates the light. Weighs only 2 lbs. Safe, durable, and efficient.

Write for particulars and booklet.
