

Farmers!

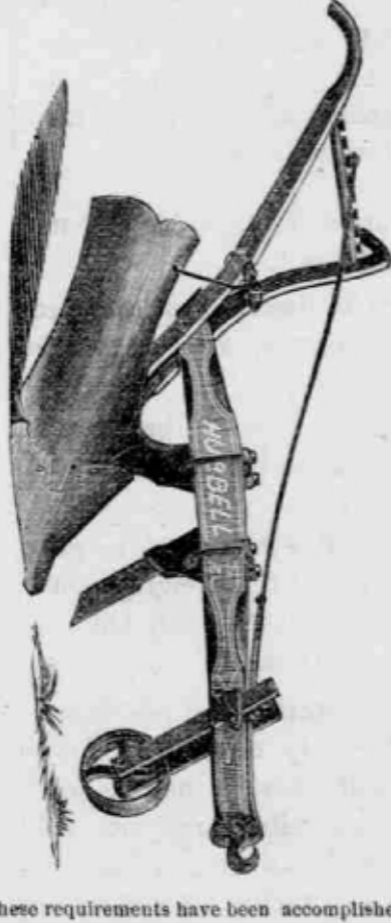

A WORD ABOUT

PLOWS!

It is an easy matter to recommend a plow. Nearly all plows in use are highly recommended by the manufacturers and selling agents. But most farmers know that a good reversible plow, one that will cut a right and left hand furrow of equal widths, work on level land as well as hill side, and satisfy the farmers, has been a hard thing to find. In the

HUBBELL

REVERSIBLE PLOW

All these requirements have been accomplished. We make this statement, and are prepared to back it up:

It is the Best Plow made in the United States,

FOR THE FOLLOWING REASONS:

1. It is the simplest plow made for the amount and kind of work it will do.
2. It has no parts that will get out of order, any more than a common side-hill plow.
3. It has no more pieces than a common plow.
4. The plow can be landed when in use as well as when not in use.
5. Do not have to leave the handles at all to change the amount that it will run to land.
6. Do not have to use the wrench or any tool to set, or change the width of furrow.
7. Can be changed instantly, to cut any width of furrow.
8. Can be set instantly to cut any width of furrow.
9. Can be run on to the land more or less, running either way while in motion. (All farmers know that it is a great point to be able to cut the same width of furrow running both ways without regard to the team crowding off or in the furrow, and the Hubbell Plow will do it every time; and this cannot be done with any other plow.)
10. It works as well on level land as on side-hill.
11. It has a movable cutter attached in such a manner that by merely drawing the plow back it will free itself from sticks and stones. It also keeps the plow from getting out of the ground, by stones getting between the plow nose and cutter. In such case the cutter will fly up and free itself and not throw the plow out of the ground.
12. It is the easiest draft plow made.
13. It leaves the soil in the very best of shape to harrow in, namely, pulverized and light.
14. It holds easier than any other side-hill plow.
15. Points are chilled the whole length of the cut.
16. It has a shoe or bottom that can be replaced when worn, by any farmer.
17. All our plows are ground smooth and are ready to work when they leave the shop.

More than one hundred of these plows have been sent from the shop within the last year and we have never heard a word of complaint about one of them, but have lots of the best testimonials in their favor.

We also manufacture other plows, both swivel and land, as will be seen by the following list, that have given general satisfaction:

Murkland Side-Hill Plow, No. 1,	\$12 00
" " " " No. 2,	11 00
Hubbell, Nos. 5 and 6,	15 00
Wooley Land Plow, No. 1 premium,	13 00
" " " No. 1½,	12 00
" " " No. 2,	11 00
Cultivators,	\$5 00 and 6 00
Spade Cultivators,	3 00

The Wooley Plow, made by us, is as made by Mr. Wooley, not the improved (which every one says was not an improvement), but the old plow just as he made it, only we make it better by grinding the mold boards smooth.

100 Kinds of Plow Points constantly on hand!

Send for circulars of Stoves, Stove Backs, Fronts, Plow Points, Cast Iron Sugar Arches, Plows, &c., &c. Photographs of Arches on application.

Founder and Machinist.

Barton, Vt.

I wish to call the attention of the patrons of this paper that I have bought the patterns formerly used at the

STRICKLAND FOUNDRY

of Bradford, and would be pleased to furnish castings from the same. These include pulleys, gears, plows, etc. I have also full sets of patterns for the following **swivel plows:**

No. 160 Charter Oak, No. 2 Buzzell (excelsior), No. 4 Matthews, No. 2a Sod and No. 7a Matchless, Nos. 0, 1, 2 and 3 Yankee, No. 76a and b, 2, 3, 4 and 5 North American, Nos. 0, 1, 2 and 3 New England, and Nos. **4, 5, 6 and 7 Hubbell.**

For right-hand plows Nos. 1, 2 and 3 Wolley.

I have also repairs for other plows too numerous to mention, including 200 different kinds of plow points.

Please send for circulars of our sugar arches—the best made in the United States.

J. W. MURKLAND,

Barton,

Vermont.
