NOSE GUARD FOR SPECTACLES IN STOCK.

ESTABLISHED IN ST. LOUIS, 1862
ESTABLISHED IN DECATUR, ILL., 1886.

Decatur, Ill. Dec 26th 1887

Dear Brother:

Again I wish you a Merry
 Christmas, this is our day, here in Decatur of all
 "celebrating" instead of "retiring" that is: generally so
 many stores are few but others are closed
 that banks are all closed today. I rec^d
 your letter of the 19th and presume you
 had just rec^d mine about the same date
 your statement about the snow puts
 me in remembrance of old times in Vermont
 because I have never seen any such snow
 here although we have quite heavy storms
 sometimes, but generally it goes away
 soon. We have had none
 to anything here yet, even
 in the State,
 will not have
 would not
 a part of
 to it as
 "closed" you

If Dr. Mc Culranty, should he come to his own
relief after July had continued the case to success.
~~about~~ I fear I unnecessarily alarmed you
about my growth, we cannot tell yet what it
is but the case seems to yield to treatment,
and is better now, however if it is malignant
we all know what to expect, now time
will develop that, send regards to Ralph
and the Duns family to Oscar's family
and Mary Christmire to all of them
Love
J. D. Hubbell

My patent adjustable Nose Guard for Spectacles, covers all
adjustable Nose Guards for Spectacles.

Decatur, Ill., Jan 30th 1888

Dear Brother:

I must make my mind
very soon what I am to do, and I find it diffi-
cult to come to any definite conclusion. First can
I sell out here about save myself, or can I sell out
and not lose too much of the little I have.
That is to prove. What in your opinion,
can I go into in St. Louis, at Moberly, or some
large town, and invest from six to seven
hundred dollars, that will make a fair out-
"look for success. If I should go there
to live, going next summer and coming
"back would be an unnecessary expense
besides the time, and would deplete my
little means too much the question is
what to do. If you and come back
will probably mean never to go
again. That will solve the
problem I mean.

THE HUMAN EYE.

Will we give it our best attention?

Dr. T. P. Hubbell's
