

The Inter State Irrigation Association are arranging for a meeting in southwestern Kansas in the near future. E. R. Moses, president of the association, has been corresponding with Capt. J. H. Churchill, and has settled it that the meeting be held in Dodge City the latter part of May. Kansas City business men and capitalists are taking great interest in western Kansas now. Col. Stowe and **Mr. Ira Hubble, of Fairbanks**, Morse & Co., Kansas City, will come out, and **Mr. Hobble** will give a good paper on reservoirs. Other jobbers of Kansas City are also expected, and J. E. Emery, of Lawrence, lecturer of the association, will also be present. A great deal of practical information can be obtained by our farmers who attend. It will pay every one to be at this meeting.
