LIST OF CHURCH RECORDS
IN THE CONNECTICUT STATE LIBRARY

This is a revised and amplified version of the list last published in 1970. It includes all manuscript records of churches held by the State Library in June 1976. Many of the records are originals, often bound; others are photostat copies made in the Library, with the originals returned to the church.

The list includes location indicators: call numbers (974.62 ...) for records included in the catalogued manuscript collection, and record group numbers (RG 70: ...) for records in the archival group. The symbol SLI (State Library Index) identifies those materials from which vital records data (births, deaths, marriages, baptisms) have been abstracted for the church record abstract file on slips that is kept in the History Reading Room.

More complete descriptions of the records may be found in the card shelflist of the catalogued manuscripts or in the Registration Sheet of Record Group 70.
